# Ancient-Grain Pizza Crusts

In recent years, there has been a massive shift from “good enough” foods to “healthier is better” foods, in just about every food category. More and more restaurants are including plant-based and healthier options on their menus and you probably won’t be surprised that “plant based options” is currently the #1 trend in the industry as of now.

## High performance and simple kitchen processes

We realize that a functional kitchen is a happy kitchen; low ticket times and few errors during even the busiest shifts is always the goal. With substantial refrigeration life (7 days), an oven-ready crust is always within reach.

## Change in landscape

Coupled with a year of uncertainty in their OWN lives, many patrons are looking to their go-to spots for better-for-you-options, more now than ever. In addition to convenience of takeout and delivery, many are focused on their health and well-being.

## Culinary driven for maximum profit & guest support

Guests want a superior option; they are no longer looking for “good enough” when it comes to gluten-free. Help drive a higher check average with quality products that guests can consistently count on.

## Vegan, ZERO Top 8 Allergens

We firmly believe in “quality over quantity”. Our Ancient-Grain crusts are vegan and contain ZERO of the top allergens (eggs, soy, dairy, gluten, fish/shellfish, tree nuts, peanuts and wheat).

## MEETING THE NEEDS OF YOUR GUESTS
